

Installation and Care Instructions

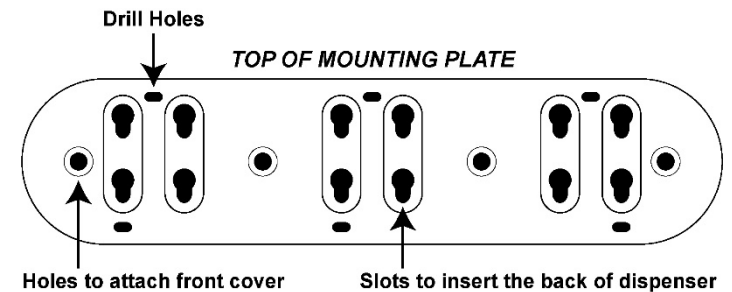

For wall mounted EcoLux Pull triple dispensers

www.DiversifiedHospitality.com

Sink Locations

1. Select the appropriate location where dispenser can be secured.
2. Ensure that fit will allow for suitable height above and below dispenser for use and access for refilling liquid chamber at the top.
3. Use provided hex key to unlock dispensers at the bottom of the mounting plate. Pull up and out to remove dispensers.
4. Use a flathead screwdriver in bottom slots of mounting plate to remove the front cover.
5. Place the mounting plate onto the wall. Drill into the wall using an appropriate drill bit (screws and fit plugs are provided) for all 6 drill holes.
6. Reattach the front cover to the mounting plate.
7. Place the 4 insertion slots on the back of each dispenser into the slots in the mounting plate and press down to ensure that it locks into place. Use provided hex key to lock dispensers at the bottom of mounting plate to secure dispensers.

Note: Although dispensers are suitable for most surfaces, it is not guaranteed for all. Please ensure that dispenser is suitable for the desired surface prior to installation.

Dispensers can also be mounted to tile surfaces using double-sided mounting tape. If this method is used, it is recommended that a 24-hour waiting period be observed to ensure that the adhesive has set.

Shower Locations

Recommended minimum height from floor to bottom of the dispenser is 40 inches. Fit dispenser near a corner to reduce hazards. See above for mounting instructions.

Filling Dispensers

1. Use provided hex key to unlock the top of the liquid chamber.
2. Fill the liquid chamber with a maximum of 500 mL of liquid.
3. Use provided hex key to lock the top to prevent anything from getting inside the liquid chamber.

Cleaning

For best results, clean with soapy water and microfiber cloths. In hard water areas, clean with vinegar to remove limescale. Harsh chemicals or abrasive cleaners should not be used.
